

## **“Your opportunity to train your staff to a National Certificate level in the selection and use of Pumps and Pump Systems.”**

**A first for the PIA** we are bringing a new level of Competency based training to the Industry. The course will benefit those who are looking to make a career in the Pump Industry. The units being offered are Nationally recognized Competencies and will be of value to you and your staff now and in the future.

The National body Irrigation Australia Limited using certified and recognised Trainers is facilitating this course on behalf of Pump Industry Australia. IAL is a Registered Training Organisation

Although the subject titles on offer refer to Irrigation Pumps and Systems the material being taught is applicable to all Pump Installations. If your business is in Industrial or Commercial pumping the principals of pumping hydraulics included in this course are equally applicable to your business.

The course on offer is a four (4) day program, three (3) days in a virtual classroom and one (1) day of practical activities to be held at a venue in your capital city following the current Government lockdowns.

Upon satisfactorily completing of the course - qualifying participants will be awarded a (Statement of Attainment) for the three Competencies

Places on the first course are limited and as an opening promotion the price per head to attend has been significantly discounted.

Don't miss out get in early to register.

See the attached flyer for more details and information on how to register.
